

Level 3 — Hard (H) Number to YWD — Numbers

Write a Java Program to Convert a Given Number of Days in Terms of Years, Weeks & Days.

Sample Input&Output:

Enter the number of days:756

No. of years:2

No. of weeks:3

No. of days:5

Test cases:

1. 38

2. 3.6

3. 0

4. -365

5. -45

Testcase:

Your Code

```
1 import java.util.*;
2 class Main{
3     public static void main(String[] args){
4         Scanner sc=new Scanner(System.in);
5         System.out.println("Enter number of the days: ");
6         double days=sc.nextDouble();
7         if(days<0){
8             System.out.println("invalid input. Number of d
9         }else{
10             int years=(int) (days/365);
11             double remainingDays=days%365;
12             int weeks=(int) (remainingDays/7);
13             double finalDays=remainingDays%7;
14             System.out.println("No. of years: "+years);
15             System.out.println("No. of weeks: "+weeks);
16             System.out.println("No. of days: "+finalDays);
17         }
18     }
19 }
```

Program Input (stdin)

Enter input if required...

Output

```
Enter number of the days:
No. of years: 2
No. of weeks: 3
No. of days: 5.0
```

Run

Save

Level 3 — Hard (H) Students-Teachers — Control

Write a program to find the number of student users in the college, get the total users, staff users details from the client. Note for every 3 staff user there is one Non teaching staff user assigned by default.

Sample Input:

Total Users: 856

Staff Users: 126

Sample Output:

Student Users: 688

Testcase:1. Total User: 0

2. Total User: -143

3. Total User: 1026, Staff User: 1026

4. Total User: 450, Staff User: 540

5. Total User: 600, Staff User: 450

Your Code

```
1 import java.util.*;
2 class Main{
3     public static void main(String[] args){
4         Scanner sc=new Scanner(System.in);
5         int totalUsers=sc.nextInt();
6         int staffUsers=sc.nextInt();
7         if(totalUsers<0||staffUsers<0){
8             System.out.println("Invalid input");
9         }else{
10             int nonTeachingStaff=staffUsers/3;
11             int totalStaff=staffUsers+nonTeachingStaff;
12             int studentUsers=totalUsers-totalStaff;
13             System.out.println("Student Users: "+studentUs
14         }
15     }
16 }
```

Program Input (stdin)

Enter input if required...

Output

```
Student Users: 688
```

Run
